

MistAway Does All the Work So You Don't Have To.

There has never been a more effective, convenient method for preventing bites in your yard. Never again will you have to spray your kids with messy repellents or remember to fog your yard before an evening cookout.

Flower Power.

The insecticide is derived from chrysanthemum-like flowers and is quickly degraded by sunlight or rain. There is no residue, and insects don't develop resistance to the ingredients.

MistAway.

Introducing the revolutionary automatic misting system that effectively eliminates mosquitoes and other biting insects from your yard.

Automatic Outdoor Insect Control.

The MistAway System automatically sprays a fine mist of botanical insecticide through nozzles installed around the perimeter of your yard.

Two to three short mists per day - usually scheduled around dawn and dusk - is all it takes to achieve amazing control.

State of the Art. From the Market Leader.

Choose either our innovative tankless unit or traditional drum-top system and rest assured that you are purchasing the most reliable and highest quality product in its class. MistAway's systems are weather-tough, easy to use, and offer important features including:

- remote control
- agitation
- leak detection
- wind sensing

A MistAway System will offer you years of precise, reliable service. Why wouldn't you buy the best?

Virtually Invisible.

One of our experts will come to your home and professionally design a system layout customized for your yard. Let us install our precision-engineered misting nozzles to stop mosquitoes at the source while preserving the beauty of your yard. Once installed, the system virtually disappears into the landscape – you won't even know it is there.

Stop and Smell the Roses.

Life is too short to feel uncomfortable in your own backyard. With a MistAway System, you don't have to.

Rediscover your backyard.
